MANAGEMENT AREA MAP

ALTERNATIVE A

A 13.72: AL5/map/alt. A

Management Area Legend

1 Mixed even-aged forest with a large aspen component, wildlife species emphasis on ground cars well as other early successional species, roaded recreation environment, roads generally open except for seasonal closures.

2 Uneven-aged hardwood forest; wildlife associated with shade tolerant vegetation, particularly non-game species; roaded recreation environment with roads generally open except for seasonal closures.

3 Even-aged hardwood forest associated with wildlife species; roaded recreation environment with most roads closed except for seasonal openings.

4 Even-aged conifer forest with associated wildlife species; roaded recreation environment with some roads closed.

5 Area designated Wilderness and managed as proposed wilderness regions.

6.1 Forest area managed primarily for semi-intensive, concentrated dispersed recreation opportunities and wildlife habitat such as forestry, bear, davis/tionella, birds and mammals. Most roads closed except for seasonal openings.

6.2 Even-aged hardwood timber stand management; clearcutting in nearly all years; administered by commercial, partial harvesting methods; wildlife habitat; roaded recreation environment; roads generally open except for seasonal closures.

6.3 Timber management; intensively managed wildlife species; roaded recreation environment; roads open, but may be closed for short periods during harvesting activities.

6.4 Area designated and managed as the Allegheny National Scenic Area.

7 Intensively developed recreation areas.

8 Protection and management of unique areas; roaded recreation environment; limited harvesting methods.

9.1 Forest area managed with mixed intensity goals; emphasis on protection and management of the Allegheny National Forest.

Research Facility Concentration/Experiment Area. The number within the symbol is keyed to a brief facility description. Some may not be shown on the Forest Site.

MANAGEMENT AREA MAP

ALTERNATIVE B

A 13.92 : A15/map/alt. B

Management Area Legend

1 Mixed even-aged forest with a large aspen component; wildlife species emphasis on grouse as well as other early successional species; roaded recreation environment, roads generally open except for seasonal closures.

2 Uneven-aged hardwood forest; wildlife associated with shade tolerant vegetation, particularly non-game species; roaded recreation environment with roads generally open except for seasonal closures.

3 Even-aged hardwood forest; associated wildlife species, particularly big-game; roaded recreation environment with most roads closed except for seasonal openings.

5 Area designated Wilderness and managed to protect wilderness values.

6.1 Forest area managed primarily for semi-primitive motorized dispersed recreation opportunities and wildlife species such as turkey, bear, cavity-nesting birds and mammals. Most roads closed except for seasonal openings.

6.2 Even-aged hardwoods, logging activities limited to one decade every 40 years; associated wildlife species, particularly big-game; semi-primitive non-motorized recreation emphasis between harvesting decades. All roads closed.

6.3 Strong wildlife emphasis with interspersed wildlife openings, ponds, potholes, conifer stands, and hardwood stands; emphasize riparian wildlife species such as, waterfowl and warm-water fish; semi-primitive motorized recreation environment with roads closed.

6.4 Area designated and managed as the Allegheny National Recreation Area.

7 Large-scale developed recreation areas or resorts.

8 Protection and management of unique scenic, research, or natural areas having National significance.

9.1 Forest area managed with minimal investments only to protect the environment and the incidental forest user.

19 Recreation Facility Construction/Expansion. The number within the symbol is keyed to a brief facility description in Table 4-3 on page 4-6 of the Final EIS.

MANAGEMENT AREA MAP

ALTERNATIVE D

(PREFERRED)

A 13.92: AL 5/map/alt. D

Management Area Legend

1	Mixed even-aged forest with a large aspen component; wildlife species emphasis on grouse as well as other early successional species; roaded recreation environment, roads generally open except for seasonal closures.
2	Uneven-aged hardwood forest; wildlife associated with shade tolerant vegetation, particularly non-game species; roaded recreation environment with roads generally open except for seasonal closures.
3	Even-aged hardwood forest; associated wildlife species, particularly big-game; roaded recreation environment with most roads closed except for seasonal openings.
5	Area designated Wilderness and managed to protect wilderness values.
6.1	Forest area managed primarily for semi-primitive motorized dispersed recreation opportunities and wildlife species such as turkey, bear, cavity-nesting birds and mammals. Most roads closed except for seasonal openings.
6.2	Even-aged hardwoods, ongoing activities limited to one decade every 90 years; associated wildlife species, particularly big-game; semi-primitive non-motorized recreation emphasis between harvesting decades. All roads closed.
6.3	Strong wildlife emphasis with interspersed wildlife openings; ponds, potholes, conifer stands, and some-what even-aged hardwood stands; emphasis riparian and wildlife species such as, waterfowl and warm-water fish; semi-natural to motorized recreation environment with roads closed.
6.4	Area designated and managed as the Allegheny National Recreation Area.
7	Large-scale developed recreation areas or resorts.
8	Protection and management of unique scenic, research, or natural areas having National significance.
9.1	Forest area managed with minimal investment, only to protect the investment and the incidental forest user.
⛺	Recreation Facility (Campground/Expansion). The number in the symbol is keyed to a brief facility description in Table 4-3 on page 4-41 of the Final EIS.
